

Calculator

- 10 Heading/Docs
- 10 Buttons and text field in window in correct locations
- 10 All buttons added to the listener with something added to the text field
- 20 Binary operators function properly with result updated in window
- 15 = evaluates the current operation and updates the window
- 10 CE and clr work properly
- 5 Sqrt
- 10 chaining both with/without the = sign
- 5 Percent implemented as described
- 5 Decimal works properly (no multiples)

Bonus:

Add another row of buttons across the bottom and use all of them to provide some useful functionality of your choice. USEFUL, for example: trig functions or memory functionality.

ALSO, prettify your calculator using color and other enhancements.
